Note: "Families" years 2002–2007 are sourced from New York City Department of Homeless Services (DHS) Critical Activities Reports; years 2008–2014 are sourced from DHS Daily Report monthly averages. Number of children by age reflects the total count of individual children served in DHS family shelters per month, while "Families" reflects the daily average number of families served in the shelters during that month. Prior to 2008, family counts included both families with children and adult families. Beginning in 2008, DHS began counting families with children and adult families separately, and the graph for those years shows only families with children.

Note: The number of homeless students by grade does not add up to the total number of homeless students because of students whose grade level data are missing and are not counted in grades pre-K–12. "–" either indicates that the data would display 10 or fewer homeless students or that the total N is under 30.
